1.1 SHORTER TITLE

doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum.

1.1.1. An example subsection

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum.

And finally a subsubsection. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum

nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum.

Chapter 2

Citations and References

This chapter demonstrates how to use citations in your thesis. The bibliography entries are defined in `references.bib` and rendered at the end of the document.

Section 2.1

Bibliography Configuration

This template uses the APA citation style with a single bibliography at the end of the document. You can change the style by passing a different builtin style name to the `bibliography()` function in `main.typ`. You can also use custom CSL (Citation Style Language) files. See the Typst documentation for more information.

If you prefer separate bibliographies at the end of each chapter, use the `alexandria` package.

The Typst bibliography function uses Hayagriva as its backend. References can be passed as a path to a BibLaTeX `.bib` file or a Hayagriva `.yaml/.yml` file.

2.1.1. Parenthetical Citations

A parenthetical citation places the full reference in parentheses. Write the citation key directly:

2.2 TABLES, FIGURES, AND DATA

- @shepard1987 produces: (Shepard, 1987)
- @fodor1988 produces: (Fodor & Pylyshyn, 1988)

2.1.2. Narrative Citations

For narrative citations where the author name is part of the sentence, use the `cite` function with form: "prose":

- #cite(<heiderrimmell1944>, form: "prose") produces: Heider & Simmel (1944)

For example: Heider & Simmel (1944) demonstrated that observers attribute intentions to geometric shapes.

2.1.3. Multiple Citations

Multiple works can be cited together by listing them consecutively:

- @fodor1988 @moggi1991 produces: (Fodor & Pylyshyn, 1988; Moggi, 1991)

2.1.4. Specific Locators

To cite a specific page, chapter, or section, add the locator after a comma:

- @shepard1987[p.~1320] produces: (Shepard, 1987, p. 1320)

Section 2.2

Tables, Figures, and Data

This section demonstrates how to include tables, figures, and dynamically loaded data in your thesis.

2.2.1. Reading External Data

Typst can read values from external files, which is useful for reporting statistics that may change as you refine your analysis. For example, the participant count can be stored in a separate file and inserted into the text.

2.2 TABLES, FIGURES, AND DATA

In our study, $n = 42$ participants completed the experimental protocol. This value is read from `data/participants.txt`, so updating that file automatically updates the manuscript.

2.2.2. Tables

Tables are created using the `table` function and wrapped in `figure` for captioning and cross-referencing.

Condition	Mean	SD	n
Control	2.34	0.89	14
Treatment A	3.67	1.12	15
Treatment B	4.21	0.95	13

Table 1: Descriptive statistics by experimental condition.

As shown in Table 1, Treatment B produced the highest mean response. Tables can be cross-referenced using their label (e.g., `@tab:descriptives`).

2.2.3. Figures

Figures are inserted using the `image` function, also wrapped in `figure` for captioning.

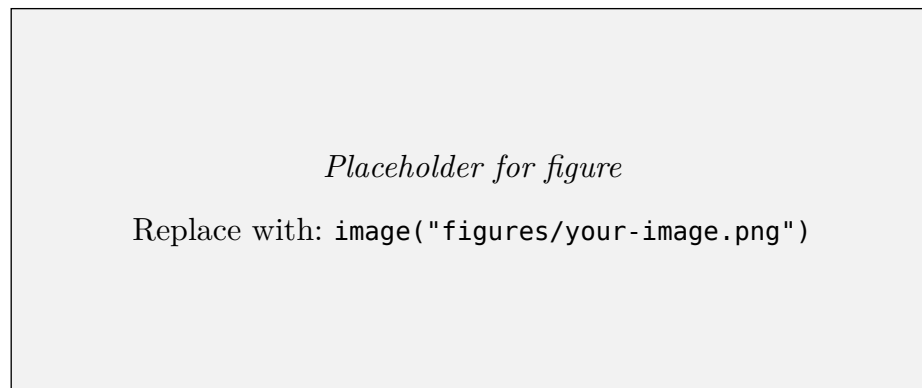

Figure 1: Example figure placeholder. Replace with actual image using `image("path/to/file.png")`.

Figure 1 shows a placeholder that can be replaced with an actual image. Supported formats include PNG, JPEG, SVG, and PDF.

2.2 TABLES, FIGURES, AND DATA

To insert an actual image:

```
#figure(  
  image("figures/results.png", width: 80%),  
  caption: [Experimental results across conditions.],  
) <fig:results>
```
